

SynerGEE® Electric

GIS integration with MiddleLink & DataPrep

Building SynerGEE® models from your GIS

You've invested a lot of time and money into your GIS, building detailed models and organizing data. Now, you also need models for SynerGEE®. Wouldn't it be nice if you could simply extract and convert your GIS models, all with just a few clicks? Advantica has the answer.

A turnkey approach - The Advantica solution

Using MiddleLink in conjunction with customized DataPrep software, we can develop an extraction system that is quick, flexible, and nearly automatic. All you need to do is specify file names and locations, and the software does the rest. Complete and functional SynerGEE models from your GIS, fast and simple.
